

**The construction of Etix Jokkmokk #1 has just started.
Etix Everywhere announced the launch of its 12th data center dedicated to HPC in Sweden.**

Jokkmokk, Sweden – May 23rd, 2017 – [Etix Everywhere](#), a global data center provider and operator, [ArcticSites](#), a Swedish development agency and [Diginex](#), a multinational crypto-asset investment services and distributed ledger technology (DLT) company, announce that construction of Etix Jokkmokk #1, a colocation data center above the Arctic Circle in Sweden, has just started.

An efficient clean-energy data center for HPC

A year ago, Etix Everywhere and ArcticSites announced the start of the marketing process of the future data center. Thanks to Diginex, a company that has recently booked 8 MW of colocation capacity, Etix Everywhere and ArcticSites have been able to start the construction of the data center. Diginex was looking for substantial capacity in Europe in order to expand its network of data centers and to grow its High-Performance Computing (HPC) business.

“As we were expanding our capacity in Europe, we were looking for an highly-efficient infrastructure.” explained Miles Pelham, Chairman at Diginex. *“Etix Jokkmokk #1 was chosen as it ensures optimal conditions with sustainable energy coming from a nearby hydro power plant.”*

A great boost for the local economy

Jokkmokk is located in the second biggest municipality of Sweden, Norrbotten. The mayor of the county, Robert Bernhardsson, welcomes the project as it will boost the local economy.

“Etix Everywhere committed to work with local and regional companies to build the data center.” stated Bernhardsson. *“This cutting-edge infrastructure will not only create direct jobs, but also boost the digital ecosystem of the county.”*

The construction is currently starting and the first phase of the facility will be live in 3 months only. As the local and regional companies are going through digital transformation, the infrastructure will also create indirect jobs in maintenance operations and digital services.

A new location for Etix Everywhere network of smart data centers

“Etix Everywhere is currently building a global network of edge data centers.” said Jörgen Venot, Senior Vice President Europe. *“Sweden is a location of choice for the industry as the country offers undeniable advantages.”*

Etix Jokkmokk is the 12th data center being built by Etix Everywhere, and Sweden is the 6th country where the company opens an infrastructure after France, Morocco, Brazil, Belgium and Ghana. This data center marks the next phase of Etix Everywhere's expansion since Etix group announced a major capital increase for new edge data centers.
